Hi Darrel, I wanted to write a letter of thanks. The remodeling of the office was a process that your staff at Kisik walked us through seamlessly. Throughout the entire process any questions or concerns were addressed immediately.

On my initial call the staff were out immediately measuring the office and pulling together CAD drawings.

Based on my budget and what we were trying to achieve with the space we were provided a range of options. When I mentioned I had a tough time visualizing what we were considering an appointment was immediately coordinated to go to the office manufacturers warehouse to see the actual furniture displayed.

Once our decision was made I was kept informed during the production phase so that installation could be coordinated so as not to impact our busy retail operation.

There isn't a day that goes by where customers are not commenting on the new look and I honestly believe the new furniture has created a better working atmosphere for the staff. Finally with the new office furniture the functionality of the office has been greatly enhanced and we are more productive.

I couldn't have asked for a better experience.

Thank you.

Kindest regards,

Scott La Croix, C.A.I.B., R.I.B (Ont), B.A.
